Akshara varshini

Cloud & DevOps Engineer | AWS | Linux | Docker | Git | CI/CD | Bash | Cloud Deployment

Coimbatore, Tamil Nadu, India

Summary

I’m passionate about turning code into reliable, scalable applications that actually work in the real world. I’m a Computer Science student building my career in Cloud & DevOps, with hands-on experience working with AWS, Linux, Docker, Git, CI/CD, Bash, and cloud deployment. I enjoy working on the part of software development that happens after the code is written , automating workflows, containerizing applications, deploying them to the cloud, and making systems easier to manage and scale. My current focus is strengthening my skills in AWS, Docker, Linux, CI/CD, cloud infrastructure, and DevOps automation through practical projects and continuous hands-on learning. What I bring: • Cloud & DevOps fundamentals • Linux & Bash scripting • Docker & containerization • Git & version control • CI/CD automation • AWS & cloud deployment • Problem-solving and continuous learning I’m looking to connect with DevOps engineers, cloud professionals, and teams building modern infrastructure and cloud-based applications. If you're working in Cloud or DevOps, let's connect !

Education

Sri Shakthi Institute of Engineering and Technology

· (2024 - 2027)
